SPEED

The crowd stirs as 16-year-old gymnast Simone Biles mounts the balance beam at the 2013 World Artistic Gymnastics Championships in Belgium.

The beam is 4 feet high, 16 feet 5 inches long, and only 4 inches wide. Walking across its surface would be a challenge for most people, but Simone must do far more than that to earn a gold medal.

During her 90-second performance, Simone must leap high in the air, spin completely around on one foot, and execute handsprings and flips before falling off the beam or landing on her back.

To start her routine, she performs pirouettes on one foot twice, then pulls off a flawless dismount that leaves the crowd gasping with each move, before landing on the beam. She performs dances on the beam. She ends with a full twisting backflip through the air, Simone lands on her feet, and the

The judges are impressed, too, rewarding Simone with her first All-Around title.

Making Her Mark

Since then, Simone has taken the gymnastics world by storm. She is the first female to win three straight All-Around World Championships, earning a total of 14 medals, 10 of them gold.

Definition

spin

1: to turn around fast
Ex: Can you see the wheel spin?
